¹Local or network storage must have multiple physical disk arrays using the correct RAID level to properly separate workloads and assure redundancy. ²SQL Server includes components such as SQL Server Data Tools and IIS 8.0+. These components can be installed at any time during or after installation. ³SQL Server must not be installed on any domain controller server and should not be installed on the same server that runs the Web Server (IIS) role. ⁴Procede's assigned Windows login account must be granted the SQL Server 'sysadmin' role. ⁵Please visit our Customer & Resources Portal for more info as compatible hardware may change over time. ⁶Currently, Internet Explorer functions in an Excede environment, but is not supported. Note that Microsoft discontinued support for IE10 on 1/14/2020 and for IE11 on 8/17/2021. ⁷Excede Analytics Suite includes Data Insight and KPIs & Metrics. ⁸SQL Server, Windows Server Operating System and Windows Operating System - newer versions may be available but are not yet supported unless noted above.
