

Excede® Data Insight

Key Features & Benefits

- Fully integrated with Excede to provide dashboards and reports using real-time data
- User-friendly, web-based graphical interface allows users to create, edit and schedule reports
- Rapid Report and Dashboard Wizards simplify the process of building new reports and dashboards from scratch
- Export data to common formats including Excel, Word, PDF and CSV
- View reports from your PC, tablet or mobile phone
- Automated scheduler to run, deliver and archive reports based on a user-defined schedule
- Schedule sending automated alerts and reports
- Depending on network setup, access reports from anywhere with an Internet connection
- Permission-based security based on a user's role and credentials

Getting Started

If you are interested in leveraging Excede Data Insight, please submit a work order request via our [Customer & Resources Portal](#). Our sales team will review pricing details and provide a quote and/or contract terms.

Make data-driven decisions to improve your dealership's performance.

Excede Data Insight is a reporting and analytics tool that leverages the data already in Excede to help you produce a limitless set of graphical reports and dashboards. The web application includes over 125 prebuilt reports and dashboards for every department in your dealership to get up and running from day one. Additionally, users can create their own custom reports, make changes to existing reports, and analyze data in a variety of formats.

"With Data Insight, if an employee is curious about any part of the business that they are involved with, they can create a live report showing them the status. It will, without a doubt, push our dealership forward in efficiency and understanding our customers' behavior."

**Casey David, Parts Sales & Marketing Director,
Nelson International**
